Grace Hopper Celebration of Women in Computing (GHC) is the preeminent event for women in computing. At GHC, you will meet a thriving academic community of women technologists and connect with the next generation of graduate students and faculty members.

In 2014, over 475 academic institutions were represented at GHC. 2,796 students from 65 countries attended the workshops, poster sessions and special programs. They overwhelmingly reported that they felt greatly inspired, less isolated and more committed to their field of study as a result of attending GHC.

**Make valuable connections**

GHC is the world’s largest gathering of women in computing and the best place for you to connect with top innovators from industry and academia.

“I am completely energized to continue my club activities and empower females in the computer tech field. This was Disneyland for techies! I am completely hooked. I can’t wait to attend the next GHC with my students.”

- Leilani Benoit, Associate Professor

**Keep your students inspired**

Students make lasting connections with each other that let them know they’re not alone. Leading women technologists act as role models and inspire students to stay in the field and to go as far as they can dream. Academic institutions can showcase computing careers and advise students on next steps to take.

“I’ve bonded with many women in computer science who share the same passion for technology and drive to succeed. I will not only leave GHC with the connections I’ve made, but with a new outlook and a newly ignited flame for computer science.”

- Vania Nettleford, Stevens Institute of Technology

**GHC 2014**

**UNPRECEDENTED PARTICIPATION AND IMPACT**

- **7,803 ATTENDEES**
  - 64% growth over 2013
- **65 COUNTRIES**
  - represented
